

Holding-box duplicate checklist

Set aside for removal review — keep the binder copies.

Date checked: _____

Holding-box tray/envelope: _____

Owner clarification: the overlapping cards are additional copies, not moves out of the binder. DoubleHolo entries may use substitute versions or contain mistakes, so its language/set labels are provisional. **This checklist does not authorize or record sale, donation, or release.**

1 Confirmed duplicate overlaps: four holding copies

The duplicate status below follows your clarification. Before choosing a copy to remove, compare the actual cards for stamp, foil, language and edition differences. Do not treat the export's NM condition as independently verified.

Card / keep in binder	Holding-box location	Check off
Eevee — SVP 173 At Rest	IMG_7088, R1C5	☐ Located ☐ Set aside Check Pokémon Center stamp against binder copy.
Charmander — SVP 44 World of People	IMG_7080, R3C1	☐ Located ☐ Set aside Export says Pokémon Center; compare actual stamps.
Darkrai — XY114 Legendary Bearing p1	IMG_7079, R3C3	☐ Located ☐ Set aside Compare language and finish before selection.
Misdreavus — No.200 Japanese; Intimidation	IMG_7082, R3C3	☐ Located ☐ Set aside No.200 is a Pokédex number; exact printing remains to verify.

Coordinates: rows top-to-bottom, columns left-to-right, with card lettering upright. Leave the binder copies in place; any decision to exchange which physical copy is retained should be recorded separately.

2 Possible additional removals: check first

- ☐ **Groudon — holding photo IMG_7080, R3C2.** Same artwork/attacks as the binder's Legendary Bearing p1 copy, recorded as **049/131, Prismatic Evolutions**; export says **Paradox Rift 93**. Compare the printed footers. Do not classify two different reprints as identical printings from artwork alone.
Result: ☐ Same printing ☐ Different printing ☐ Unresolved ☐ Set aside
- ☐ **Houndoom G — Platinum 50: two holding copies.** Both occur in IMG_7078, at **R1C4** and **R2C3** when oriented with Aquapolis Houndour at top-left. Two physical copies are visible; finish may differ. This is a holding-pool surplus decision, not evidence of a binder-rule violation.
Result: ☐ Same finish ☐ Different finish ☐ Unresolved
Keep: _____ Set aside: _____ ☐ Neither for now

3 Do not confuse departures with duplicates

Ursaring RC16/RC25, Umbreon 61/108 and Electrode 037/095 have registry records because cards of those identities previously occupied the binder and have documented departures. A matching card in the holding box is **not automatically an additional duplicate**. Reconcile physical identity before adding any of these to the removal pile.

Likewise, the proposed **Snorlax VMAX 046/060** and **Rocket's Trap (unnumbered)** extractions belong on the curatorial checklist, not this duplicate list. Those swaps are not recorded as executed.

4 Close out the review

- ☐ Label the separate pile **DUPLICATES — REVIEW**; exclude it from new thematic-placement candidates unless deliberately reconsidered.
- ☐ Photograph the set-aside group and note any variants or personal keepers to retain.
- ☐ Decide the eventual destination separately. Record an actual release only after it occurs; do not infer it from a checked "Set aside" box.

Notes / retained variants / completed action and date: _____
